Project Booster 1

Part IV:

To make the april.launch file work, the minimum topics to be recorded are:
camera/rgb/camera_info
camera/rgb/image/compressed
camera/rgb/image_raw/compressed/parameter_description
camera/rgb/image_raw/compressed/parameter_updates

To make the rviz results fully equivilent to part-III-4, I would also need camera/image_raw. But apart from that, the visualization results is the same as part-III-4.
